

LENS COLORS

LENS SELECTION CHART

NOTE All polycarbonate lenses provide 99% protection against harmful UV-A and UV-B rays. Gray lenses are NOT to be used in welding applications or environments. Filter lenses are clearly marked with the degree of protection.

CLEAR

General purposes for indoor applications that require impact protection.

GRAY

Commonly used in outdoor applications. Offers protection from excessive glare.

AMBER

Commonly used in indoor, low light applications. Enhances contrast.

ORANGE

Offers high contrast and low light image resolution.

COFFEE

Commonly used in outdoor applications. Best for enhancing depth perception.

SKY RED MIRROR

Gray polycarbonate lens with a double layer of silver and red mirror coatings. Commonly used in outdoor applications.

ICE ORANGE MIRROR

Gray polycarbonate lens with a double layer of silver and orange mirror coatings. Commonly used in outdoor applications.

INFINITY BLUE

Commonly used in indoor applications where there is an excessive amount of yellow or sodium vapor light. Offers a high level of contrast.

INDOOR/OUTDOOR MIRROR

Clear UV400 polycarbonate lens provides 100% protection from harmful UV-A and UV-B rays. Coated with a light gold mirror finish to reduce glare. Commonly used where it is required to move between indoor applications to outdoor applications.

BLUE MIRROR

Gray polycarbonate lens with blue mirror coating. Commonly used in outdoor applications. Reduces glare.

SILVER MIRROR

Gray polycarbonate lens with silver mirror coating. Commonly used in outdoor applications. Reduces glare.

3.0 IR FILTER

Commonly used around welding sites or for light brazing or cutting.

5.0 IR FILTER

Commonly used around welding sites or for medium to heavy cutting and medium to heavy gas welding.
